EDUCATION

2020-2023

VIGNAN UNIVERSITY

- Bachelor of Technology
Automobile Engineering
- CGPA: 8.84

2018-2020

STATE BOARD OF TECHNICAL EDUCATION AND TRAINING

- Automobile Engineering
- Percentage: 86%

SKILLS

CAD TOOLS:

- UG NX • Autodesk Inventor
- Navisworks • Solid Works
- Autocad

DESIGN EXPERTISE:

- Modelling • Assembly • Sheet Metal
- Drafting • Surface Modelling
- Re-mastering

SOFT SKILLS:

- Team Leadership • Collaboration
- Project Execution

LANGUAGES

PROFILE

Design Engineer with 3 years of experience in automotive and manufacturing industries, with experience in BIW engineering, Visual Build Sheets (VBS), weld and sealer documentation, 3D CAD modelling, digital factory development, robotic automation, and fixture design. Currently working at AXISCADES in BIW engineering, preparing Visual Build Sheets for weld and sealer applications. Previously worked at Actalent on digital factory and manufacturing plant modelling projects and at Green Tech Industries in industrial automation. Skilled in Siemens NX, CATIA, SolidWorks, Autodesk Inventor, AutoCAD, Navisworks and Teamcenter.

WORK EXPERIENCE

- AXISCADES** 2026 - PRESENT
Design Engineer - WIM/VBS (BIW)
 - Creating and updating Visual Build Sheets (VBS) for BIW manufacturing processes.
 - Preparing visual documentation for weld and sealer applications on BIW components.
 - Using Siemens NX and Teamcenter for CAD viewing, drafting, modelling, and engineering data management.
 - Reviewing 3D models and engineering data to accurately identify weld/sealer locations and support BIW assembly processes.
- Actalent** 2024 - 2026
Designer
 - Developed and maintained 2D/3D digital layouts for manufacturing plants, production lines, and industrial facilities.
 - Digital factory project for Ford Motors SAP, PAP, CGN and KTP Final Assembly Plants, focusing on re-mastering and parametric modelling by using UG NX and Inventor.
 - Improved factory asset functionality, and guided team in 3D part Modelling.
 - Developed 3D Assets with reference to point cloud using Autodesk Inventor and UGNX.
- Green Tech Industries** 2023 - 2024
Automation Engineer
 - Installed and commissioned ABB industrial robots and gantry robotic systems for automated manufacturing and production lines.
 - Designed and modified fixtures and gripper fingers to improve production efficiency and reduce cycle time.
 - Programmed, taught, and optimized robot motion paths to ensure accurate operation and reliable production performance.

ACHIEVEMENTS

- Spot Award - 2025 (Actalent)
- Spot Award - 2026 (Actalent)
- Took charge of the project and got it submitted on time, making sure everything met Ford's quality and design standards.
- Got recognized for being fast and accurate with parametric modelling while sticking to design guidelines.
